PATENT
Attorney Docket No.: DIVER1280-14

[36]37. (Amended) The method of claim [34]36, further comprising removing, with the recovery tool, the sample from the capillary containing the sample.

[37]38. A recovery apparatus for a sample screening system, wherein the system includes a plurality of capillaries formed into an array, the apparatus comprising:
a recovery tool adapted to contact at least one capillary of the capillary array and recover a sample therefrom;
an ejector, connected with the recovery tool, for ejecting the recovered sample from the recovery tool.

[38]39. (Amended) The recovery apparatus of claim [37]38, wherein the recovery tool includes a needle connected with a collection container.

[39]40. (Amended) The recovery apparatus of claim [37]38, wherein the recovery tool includes an aspirator for recovering the sample.

[40]41. (Amended) The recovery apparatus of claim [37]38, wherein the ejector includes a jet mechanism adapted to expel the recovered sample.

[41]42. (Amended) The recovery apparatus of claim [37]41, wherein the jet mechanism is operable by thermal energy applied thereto.

[42]43. The recovery apparatus of claim 41, further comprising a heating element connected to the jet mechanism.
